Art Unit: 1631

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to a computer system comprising certain data storage means and retrieval means, classified in class 707, subclass 103R.
- II. Claim 9, drawn to a first method, a method for performing pathway editing among protein pathways, classified in class 702, subclass 19.
- III. Claim 10, drawn to a second method, a method of using genes to annotate modes of a protein pathway, classified in class 702, subclass 20.
- IV. Claim 11, drawn to a third method, a method of protein pathway analysis, classified in class 707, subclass 1.
- V. Claim 12, drawn to a fourth method, a method of protein pathway analysis having differing steps than Group IV, classified in class 707, subclass 3.
- VI. Claim 13, drawn to a fifth method, a method for searching protein pathways databases for protein interactions, classified in class 707, subclass 3.
- VII. Claim 14, drawn to a sixth method, a method for searching protein pathways to predict homologous pathways, classified in class 707, subclass 3.
- VIII. Claim 15, drawn to a seventh method, a method for searching protein pathways to predict orthologous pathways, classified in class 707, subclass 3.
- IX. Claims 16-18, drawn to an eighth method, a method of using a known pathway to predict the nodes and modes of a novel pathway, classified in class 707, subclass 6.
- X. Claims 19-20, drawn to a ninth method, a method of predicting novel pathways, classified in class 707, subclass 7.
- XI. Claim 21, drawn to drawn to a tenth method, a method of predicting the function of a protein, classified in class 703, subclass 11.
- XII. Claim 22, drawn to an eleventh method, a method of predicting novel pathways using differing steps than those of group X, classified in class 707, subclass 6.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II-XII are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the

Art Unit: 1631

product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case The computer system can be used to record, analyze and output tables of information regarding proteins, their interactions, and uses.

Inventions II-XII are each separate and distinct from one another, as they are each drawn to differing methods using differing data, employing differing steps, having differing outcomes to differing goals. Each method would require a separate and substantially non-overlapping search. As such, the search of each of the eleven separate methods would pose an undue burden upon the examiner if not restricted.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP 821.04.

Process claims that depend from or otherwise include all the limitations of the patentable product will be entered as a matter of right if the amendment is presented prior to final

Art Unit: 1631

rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of In re Ochiai, In re Brouwer and 35 U.S.C. 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. Failure to do so may result in a loss of the right to rejoinder.

Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP 804.01.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mary K Zeman whose telephone number is (571) 272 0723.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael P Woodward can be reached on (571) 272 0722. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
